

BUILDING SPECIFICATIONS

KITCHENS

The kitchen, integrated into the living room, is equipped with large capacity upper and lower cupboard units, self-closing doors, brake, and hidden handles. The units are lacquered in a colour of your choice from the personalisation options given, with a compact quartz worktop and oven front panel by **Silestone** or similar.

The kitchen also includes a vitro-ceramic hob, electric oven, microwave and extractor system. There is a single stainless-steel sink with a mixer tap.

**As part of our personalisation programme, you can choose from various colour options for the kitchen cupboards.*

BATHROOMS

The bathrooms have a unit with two drawers, and an integrated washbasin with a mixer tap. The mirror above the unit is also included. The WC in both bathrooms is in white vitrified porcelain. The showers have a fixed shower screen and a white acrylic shower tray. The floors and walls have ceramic tiling.

In the townhouses, basements will have a pre-installation for an extra bathroom.

**As part of our personalisation programme, you can choose from various colour options for the bathroom floors and walls.*

CARPENTRY

The armoured main entrance door to the home has a spyhole, anti-leverage hinges, and a security lock. The interior doors are plain and finished in white.

The fitted wardrobes, floor to ceiling, also have plain doors in white. The interiors are lined with melamine and have a luggage shelf and a hanging rail.

Exterior carpentry is PVC or aluminium, with double-glazed windows and patio doors with thermal break and an air chamber.

The living room and bedrooms have motorised shutters with switches.

FLOORING

Inside the home, we have chosen laminate/parquet flooring with white skirting and the colour is to be decided.

Wet zones and terraces have ceramic tiling and artificial grass, according to the project plans.

Basement (only in blocks 1, 2, 4 and 5) with laminate flooring, painted walls and ceilings, pre-installation for Split-type A/C, and tiled guest bathroom with ceramic flooring, shower tray, and pre-installation for sanitary fixtures.

**As part of our personalisation programme, you can choose from various colour options for the flooring.*

FACILITIES

Each home has its own independent hot and cold air conditioning system via ducts with machinery included and centralised control. Pre-installation for split-level air conditioning in the basements.

Individual aerothermal system for domestic hot water production. **Solar panels** provide extra electrical power to the townhouses, connected to the general fuse board. Telephone and TV-TDT-SAT sockets in living room and bedrooms. Terrestrial TV antenna and satellite dish.

The building also has the required insulation to walls, roofs and windows in order to obtain a high **energy efficiency rating “A”**.

EXTERIORS

Exterior communal areas have a pool for adults and children.

The communal areas are landscaped and have completely accessible pathways.

Every home has a private parking space with pre-installation for an electric vehicle charging point.
